

Cole-Parmer®

Cole-Parmer® Paraffin Wax Dispenser - FB-200

- Temperature control as opposed to arbitrary power control
- Improved heat up rates 45°C nominal temperature for 2.25 litres water, attained within 40 minutes
- Improved temperature stability of $\pm 0.5^{\circ}\text{C}$
- Overheating prevented with new temperature control mechanism
- PTFE black interior and powder-coated white aluminium exterior
- Virtually maintenance-free and extremely easy to clean
- Black interior provides high contrast for viewing samples

FB-200 Paraffin Wax Dispenser

Cole-Parmer® Paraffin Wax Dispenser - FB-200

Cole-Parmer® paraffin section flotation bath is designed to assist with the handling of paraffin wax samples in histology and pathology laboratories. It is essentially a hot distilled water floating out bath that allows for the meticulous manipulation and location of sections onto glass slides.

The paraffin section flotation bath has improved heat up times achieving a stable 45°C using 2.25 litres of water within 40 minutes. The stability and accuracy have also been improved due to the change of control which now also allows the user to set the temperature as opposed to the arbitrary power, thereby, reducing the risk of overheating sections.

The paraffin section flotation bath has a PTFE black interior and powder-coated aluminium exterior, which makes it virtually maintenance-free, extremely easy to clean and allows for improved visibility of floating sections.

Technical Specification

Specification	FB-200
Capacity	2.5L
Temperature	30°C to 70°C
Temperature Stability	±0.5°C
Bath material	Aluminium base with PTFE coated interior
Dimensions (d x w x h)	330 x 330 x 140 mm
Weight	2.7kg
Dimensions, mm (w x d x h)	240W

Ordering Information

Description	Ordering Number	Series No.	Model No.	Legacy Sku.
